

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Mrs Helene Anderson

Date received: 16/02/2013

Marriage is by definition a voluntarily entered relationship between two adults of the opposite gender. It is not discrimination against same-sex couples (Federal parliament legislation in 2008). It is the opposite sex relationship that produces children, these children grow our society and therefore these children must be protected. They must not be deliberately inflicted with the inability to be linked to their biological parents, it would be an indictment against society if we allowed this to happen. I ask you to protect our marriage definition, protect our children.
