Subject: Submission to greyhound racing inquiry

Dear Director,

It is time the government decided to address serious concerns regarding the treatment of animals as is the case with the Greyhound Racing Industry. Either recognise the problems that exist and set about to clean up the industry, or stop the phoney rhetoric suggesting we are a first world nation that follows world acceptable standards with regard to animal welfare.. I feel Japan would tell us to fix our own backyard before telling them to stop killing whales!

Sincerely,

Trish Hendry
