INQUIRY INTO WATER AUGMENTATION

Name: Mr James Saffioti

Date received: 18/04/2016

Hello people in power

We need a new project for Australia. Seems we need water in the outback.
Make a Yangtze River system in Australia. Like the snowy one.

It will make jobs. And make Australia better.. Humans have been making aqueducts for 1000's of years. If you only think negative humans will lose.
We have a lot of sun, seems like that water +sun = life.

We need a monumental project for Australians that's not making war machines.

Making war machines = negative.
Making life = positive.

It's that simple. If you can't see that your in the wrong job.

I don't apologise for my English as I went to private schools and public schools all my life. And this is the best you made me. And it's ok for me, hope it's ok for you.

Please hear my words!

Your brother

James
