INQUIRY INTO CROWN LAND IN NEW SOUTH WALES

Name: Ms Vera Yee

Date received: 16 July 2016

Crown lands are very important for many reasons.

- * Some have undisturbed, natural land of vital importance for our flora and fauna.
- * There are areas of significant value for the environmental and recreation.
- * They need appropriate management for weed and pest control.
- * Clearing produces increased carbon emissions.
- * We must not weaken our already inadequate land clearing rules.
- * There are the vital Travelling Stock Routes which must be preserved for environmental and historic reasons.
- * There has been inadequate consultation and transparency in this process.

Sincerely concerned citizen,

Vera Yee
