## **INQUIRY INTO CROWN LAND IN NEW SOUTH WALES**

**Name:** Mrs Cita Murphy

**Date received:** 23 July 2016

---

We are making a Submission in regard to the Management of Crown Lands in New South Wales.

Crown Lands are a vital part of the Community of Thirlmere providing :

a) Environmental Conservation , shelter and food source for our Flora and Fauna such as the Red-Tailed Black Cockatoo, Kangaroos, Reptiles, Insects and small Birds.

b) generations of our Children a safe place to play, exercise and have fun

c) a popular place for Dog Walkers, Bicyclists, Horse Riders and Nature Lovers.

Unfortunately Crown Lands is also popular with those who dump rubbish , green waste and tree removal with no fear of fines because of lack of Staff, funds, confusion or ignorance between various Government Authorities on who is responsible.

We need Environmentally Sensitive Crown Lands to be given to National Parks to manage them properly.
