INQUIRY INTO CROWN LAND IN NEW SOUTH WALES

Name: Mr John Diamond

Date received: 24 July 2016

Until such time as the government can show that it is reducing the extinctions and threats to large numbers of plants and animals that have resulted from impacts of human activity, I totally oppose the changes to laws that make it easy to sell off Crown Lands in NSW. Crown Lands should remain in public ownership, and we should think ourselves lucky to have the natural diversity that still exists in NSW.
