INQUIRY INTO CROWN LAND IN NEW SOUTH WALES

Organisation: Australian Plants Society NSW Ltd Northern Beaches

Date received: 25 July 2016

The Australian Plant Society - Northern Beaches, wishes to contribute to the Inquiry into Crown Lands as we are very interested in the preservation of our natural estate assets for the protection of native flora and their habitats.

We also wish to see our ecosystem functions preserved- clean air and water and their contribution to keeping carbon out off the atmosphere.

Our area contains large areas of Crown Land and we are concerned of it being degraded by development and inappropriate use and or sold off.
