INQUIRY INTO CROWN LAND IN NEW SOUTH WALES

Name: Mr Margareta Keal

Date received: 24 July 2016

Crown Land is not for tampering with. It was set aside by past Governments for the benefit to future generations, to ensure the preservation of Australian flora and fauna, and the health of its people. These politicians had a vision which current ones have lost in their greed for short term profit.

With plenty of scientific evidence that deforestation and degradation of land can not be reversed, I expect educated people like our elected representatives to show more respect for the future health of this nation, already so ravaged by over-utilisation that have lead to large areas suffering from desalination, top soil blown into the sea during storms, warming of our continent and overall climate change.

Even a small child knows it is cooler under a tree than under the sun on a hot day.

Save our Crown Land!!!

Margareta Keal
