

**INQUIRY INTO ENROLMENT CAPACITY IN INNER CITY
PUBLIC PRIMARY SCHOOLS**

Name: Miss Jaime Walling

Date received: 1 September 2016

Terms of reference (d)

I think all the consultants fees for public relations could have been used towards the costs of the larger site at fig/wattle

Children wouldn't need education in noisy demountables on a major road with excessive noise.

(E) I think the minister has miscalculated the placements of children because they are approving extra residencies around bays precincts this will cause the school to last only a few years. What happens in those few years when all land suitable is sold. I hope fig/wattle site is for the school & the state and council can come to an agreement together instead of acting like children themselves.

(F). This is a disgrace how the fig/wattle site has been basically empty for 30 years we need the land for children to run & play safely. I would like the vision of inner city school sports tournaments to be played on the fields. Netball, running track, cricket games for all to enjoy on the extra 10,000m² of the site. Stamp duty and other taxes in the area have paid for this so I see no problem with the cost of the school. Land is valuable where we live so are our kids.
