Confidential

After having a long term chronic injury confirmed through a workplace health and safety accident sustained at a nsw high school I was given ongoing physiotherapy and support to maintain my health.

In 2012 I was asked to sign a form that stated I no longer needed any care for my injury this was when Alliance took over the claims from GIO. I stated I still needed care and they told me I had no option but to sign the form and close myself to anymore care.

After trying to reopen through appeal I was declined and not contacted or supported in any further way by the department of education NSW. I know many workers like myself who were cut off just due to budget cuts etc in 2012. The injuries remain with no support.
