

**INQUIRY INTO ENROLMENT CAPACITY IN INNER CITY
PUBLIC PRIMARY SCHOOLS**

Name: Mr Andrew Lawrence

Date received: 15 September 2016

as a concerned parent i do not want my daughter having to be schooled in a demountable classroom while a school is being built that is going to be too small in a few years time due to the increasing population of the area . The school should be built on the Fig and Wattle site as promised by the Baird Government where the children would have more open space to run around in and a more modern environment to learn in. please let common sense prevail and keep the children safe from contaminated land and undesirable people that frequent the wentworth park area
