No 18**

**INQUIRY INTO OFF-PROTOCOL PRESCRIBING OF  
CHEMOTHERAPY IN NSW**

**Name:** Mr James Dyson

**Date received:** 14 October 2016

---

There has been two occasions when, under Dr Phadke's care, chemotherapy has been prescribed for my cancerous conditions.

The first was for leukaemia, now over ten years ago, and the second was for bladder cancer, diagnosed over two years ago.

On both occasions the treatment enabled me to transition into the remission stage and I have had no problems since.

Nobody, but nobody, could have achieved a better result than Dr. Phadke and he has my eternal gratitude for the quality of life I am now enjoying.

To me it is inconceivable that any patient or medical authority could find fault with Dr. Phadke's treatment of his patients. I trust that your enquiry will only confirm that his patients welfare is and has always been his prime concern.

Sincerely,

James Dyson
