ON OFF PROTOCOL

PRESCRIBING OF

CHEMOTHERAPY IN NSW.

Dear Sir,

In 2002 was diagnosed with recurrent myeloproliferative disorder and since then I have been under the care of Dr. K. Phadke which has required me to be administered Busulfan (TABLET FORM OF CHEMOTHERAPY) every 2 years approximately to lower my PLATELET COUNT. This treatment has been very successful on each occasion. This of course makes me regard Dr. K. Phadke very highly and most grateful to his very caring attitude.

Yours Sincerely
John A. Mastersson
