I as a 4th generation fisherman think this reform is killing my business to make me buy more shares to continue as a commercial fisherman is unstanable. When there is no guarantee of the shares being available in the first place. After 29 years of fishing and nearly 50 with a family who is going to employee a out of work commercial fisherman this reform has been a joke from the beginning with the few people in the know not communicating and stock piling on shares. The stress this reform has caused in doubt in my mine contributed to my Heartache this year. The people making all these decision from behind a computer need to get out and talk to the every day bloke not the share mungers.
