## Personal Commercial Fishers views

(Circle the answer you support)

Given there is approximately 1% of the Australian Population allowed to commercially fish to provide seafood for approximately 78% of the population who do not fish recreationally do you agree that there is a major management issue in providing local seafood to local communities in NSW? ..... Yes / No

Your views:

Less active fishers supplying fish to local markets means less fish, full stop. It doesn't need a brain surgeon to work that out. It's a case of supply and demand. Less Fishermen = Less Fish = higher cost for the consumer.

Further Comments.

I was not consulted or asked to share my personal Catch History with the rest of the Industry.

I was also not informed that the Property right from these Shares would be of equal value (or access).

Remember to attach correspondence you have sent to DPI, or the Minister,
