INQUIRY INTO ROAD TOLLING

Name: Mr Alan Bottle

Date received: 17 February 2017

I used the M4 to travel to from mid 1970's till retirement and paid my share of tolls now it is proposed my children must now pay tolls to travel to work. On top of the tolls is the petrol taxes that should be used on road upgrades. Bad planning by governments has ensured job creations has be confined to the Sydney and CBD and this practice should cease now that an airport is to be built in the West. Wesconnect is a white elephant built years too late to be functional if the West Sydney Airport is to proceed. If Government are demanding a toll be paid on the M4 that people must use to travel to work then it should be an allowable Tax Deduction to offset Governments BAD planning. In the 1970's we moved west as governments promised jobs would be created in the West for the Mount Druitt workers and others. This has not eventuated to date.
