Submission No 22

INQUIRY INTO ROAD TOLLING

Name: Name suppressed

Date received: 21 February 2017

Partially Confidential

Hi I believe up to 7yrs ago I heard that there would never be a toll on m4 ever , and for me to use it every day from home to ryde =38km onway it will burden on me and many other users , as well as electricity bills, insurances, mortgage, cost of living is getting to be harder to live, why isn't the GOV doing simething about it????????? Everything had gone up but our wages arnt much to catchup to all of these rises, we are relying on credit and loans for the rest of our lives, it looks llike we are foorced to work day and night maybe 2 to 3 jobs to keepup with all rises and tolls, not rightway to govern australia where getting very tyred and fatigued so mucch that what's next, pay to say hellow!!! No need for a toll ,all I work with ovrr 500 employees and alll are fed up with rises and tolls, just had a great friend of mine who committed su..... and seen him 3weeks prior he said the same words tooo expensive for day to day life can't keep up. Our wages go_up 2% but all other things comeup like tolls ect ect but in totall we have to forkout around x4 times than our payrise , unbelievable when is the Gov going to stop these rises and tolls that are a great burden to many familys and individuels, kind regards a HUMANBEING WHO CARES.
