INQUIRY INTO ROAD TOLLING

Name: Ms Amanda Carr

Date received: 24 February 2017

I am a resident of the Blue Mountains and like so many in my community I commute full time to Sydney for work. I try to rely on using the train services as much as possible for the convenience, the cost and the environmental impact. Due to the nature of my job often return home in a work vehicle after meetings, and then return the vehicle the following morning. As I work for a not for profit community wonder if this new cost would be passed on to me or burden my organisation? I thought we paid for the M4 already- what is the toll supposed to provide for?
