INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Ms Mariza Harris

Date received: 7 May 2017

I as a citizen of Western Sydney am apposed to the "world's largest incinerator", which is under proposal to be built at Eastern Creek. I believe this to be potentially hazardous to the health and well-being of all. Common sense MUST prevail here. We have banned back yard fires many years ago to prevent hazards SO WHY ON EARTH would anyone think this monster will be safe? It is our RIGHT to have control over what happens in our backyard and to our health and our loved ones. NO INCINERATOR FOR WESTERN SYDNEY.
