

INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Cameron Haywood

Date received: 9 May 2017

Partially
Confidential

Strongly oppose an incinerator in the middle of western sydney, close to schools,shops,houses and our drinking water.

I am not a politician. But even this process is absurd.

The local health districts and the EPA have entered submissions against this. What do you people need to see that thos is a bad idea? If the technology was so great, why have their been so many issues overseas? Or if the technology was so great put use these with an exclusion zone the same as a piggery. This should not fall into the residential basin of Sydney.

Please stop this circus from continuing and think of the people from the lower social economic areas and fo the right thing. Let's not look back in 20 years knowing that you have the powee to stop this before it is too late.

Regards

Cameron Haywood
