INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Phil Upton

Date received: 11 May 2017

As a resident of Minchinbury for 28 years and living 1 kilometre of the proposed Incinerator Power Gen Plant. I strongly object to this development going ahead. I am concerned for my health and the health of my friends and Neighbours and the people of western Sydney. The wind we get here is predominately from the South pushing Dust and Odours from the Waste Recycle tip all over the Suburb. With the unknown mix and cocktail of materials to be burnt in the incinerator it has been stated that the mix plus or minus can not be guaranteed to be clean burning. Toxic Dusts and Gases as well as visually it is not ideal to have this Plant anywhere residences and parks and schools and playing fields.

We must not let this Development go ahead for the sake of people that near by to be affected mentally and physically to suffer in the short and long term.

I say no. Not Now and Never. No soil is to be turned on Site in Construction. It was a Quarry or Mine and like all mines and Quarries brought back filled in and restored to what it was originally as the MInes Act says!

I have just mentioned the Incinerator? The Traffic, Noise and Pollution generated now in this area is beyond madness.

I hope the person or people reading this and make sway on the decision consider not only my feelings but the 1500 House holder in Minchinbury and people in the surrounding area.
