INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 14 May 2017

Partially
Confidential

I would like to register a protest against the proposed incinerator on the following grounds.

Its location is unacceptable because of its close proximity to residents, schools and shops and any odours generated would detract from our lifestyle and reduce property values.

Extra traffic generated would increase congestion and combined with emissions from the incinerator would decrease our already poor air quality.

As I have a son living at this residence who has reduced lung function I fear any increase in pollution could be detrimental to his health

These objections have also been expressed by our neighbours who due to the closing date for submissions and interrupted internet due to ongoing nbn difficulties have been unable to lodge their complaint.

This project should not be approved.
