INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Carmel Bartkiewicz

Date received: 28 May 2017

My husband and I did live in the area for over 50 years and we are disappointed yet again that the government is determined to dump all their problems in western Sydney.

Do the decent thing and stop putting more pollution in an area that is a catch basin for pollution already. I would suggest you do an environmental impact study but know from experience that it us a 'waste' of time. Profit comes before people's health. It is time to change...people before greed.
