## **INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY**

**Name:** Mrs Cheryle Brack

**Date received:** 15 May 2017

---

I support this submission for the following reasons:

1. we must do more than we are with regards creating energy, particularly 'clean' energy
2. if that can be achieved and reduce landfill at the same time, win win
3. I understand the technology is in use, and has been for many years, throughout Europe, there should be adequate information resources to ensure Australia adopts 'best practice'
4. A positive additional benefit would be job creation also

A yes from me

Cheryle Brack(Burcher)
