INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Timothy Williams

Date received: 17 May 2017

I find it hard to believe that any modern political party would even consider such an outrageous concept as the proposed Eastern Creek Incinerator. We live in an age where the public are more educated than ever before about the negative impact pollution and irresponsible environmental policy have having on our fragile planet. The public backlash against this monstrosity will most certainly be felt during the next parliamentary elections.

I URGE YOU NOT TO ALLOW THIS ENVIRONMENTAL HORROR TO BE BUILT.

The dangers to the population and to the environment far outweigh any perceived short term benefits.

PLEASE. NO INCINERATOR IN WESTERN SYDNEY
