INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Fotos Melaisis

Date received: 20 May 2017

Dear Members of Parliament,

I write on behalf of my family and I who are recent members of the Minchinbury, NSW community. With regards to the incinerator proposal in Eastern Creek, Sydney, we express our sincere concern from a social, environmental and economical standpoint. As an environmental engineer, I have been able to assist local governments, including Blacktown City Council with the design, operation and ongoing maintenance of water treatment systems which inturn has contributed to the removal of hundreds of tonnes of waste from Australian waterways, predominantly in the Western Sydney and South East Queensland regions. We wholeheartedly believe that the development of a mass scale incinerator in our local community will have detrimental effects on air quality and living standards. Please consider intergenerational equality and Environmental Sustainable Development with the review of this proposed development.

Kind Regards,
Fotos Melaisis
