## **INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY**

**Name:** Mr Ron Rose

**Date received:** 22 May 2017

---

I strongly object to the government once again treating the residents of Western Sydney as trash (no pun intended). Building the world's biggest energy-from-waste incinerator in close proximity to my home disgusts me no end! Why should we bear the tremendous amount of pollution from this plan, together with heavy vehicles clogging our roads?

These plans are never, ever made for the more affluent areas are they? In fact, when radioactive waste was found in the Eastern Suburbs, it was though the solution was to dump it on our doorsteps instead!

Be warned! The West WILL NOT stand for this type of treatment. Any government treating us as dirt will pay the price at the polling booths!
