

INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 22 May 2017

Partially
Confidential

I urge the government to object to the building of this facility at Eastern Creek. It is close to residential areas which already suffer from odours from existing waste facilities in the area. Our area already suffers traffic congestion due to heavy vehicles using local roads, this will only make matters worse. There are plenty of areas north and south of Sydney where the facility could be built well away from residential areas. It appears to residents of Western Sydney that the area is seen as only worthy of second class development. To approve this development will be completely irresponsible.
