INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 22 May 2017

Partially
Confidential

I strongly oppose the erection of an energy-from-waste incinerator being built at Eastern Creek. It is being built too close to populated areas when there are much more ideal situated areas that are not so far but remote.

All the assurances in the world can be given but it's the one-time things that don't go to plan that cause the most harm.
