INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Arpan Patel

Date received: 22 May 2017

Being pro business is good but supporting such projects just shows how little does the NSW government care for its people over business initiatives. I can see more Medicare bills being racked up with increase in pollution and foul smelling suburb. Thanks for making us feel like second class citizens.

Why build this facility in western sydney? I dare you would ever even think of proposing to build this facility somewhere in north or east of Sydney.
