INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Margaret McCarthy

Date received: 23 May 2017

I strongly object to an incinerator being built at Eastern Creek. This is a heavily populated residential area, the majority of the population are children and I feel there is no consideration being given to this, I am very concerned about the long term health of the community especially the children in the area. We already have the waste tip close by emitting pungent odours. Why should Western Sydney have to be the site for this incinerator, I'm sure there must be a more suitable site which is less populated where families would not be exposed to this hazardous pollution. Would the NSW government like something like this in their backyard?, I don't think so.
