

INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 23 May 2017

Partially
Confidential

We do not want the world's largest Energy-from-waste Incinerator so near to schools and houses. We already have many industrial and distribution warehouses and their extensive contribution to congested traffic and pollution in the area is real. The Badgery Creek's airport will again deteriorate these even more. This Incinerator idea adds insult to injury and is not welcomed by all who cares for the environment.
