## **INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY**

**Name:** Mrs Ann Phelan

**Date received:** 23 May 2017

---

As a resident of Minchinbury I and all I know are very concerned about this proposal for EWF in disguise as a power generator knowing the growing issues in the EU and USA OF HEALTH PROBLEMS TO THE POINT NOW THEY ARE TRYING TO SHUT THEM DOWN it's a toxic waste dump if the truth with toxins that can't even be measured, and the western being a basin it struggles to clear the air I strongly condemn any thing to do with toxic waste dump were it will cost all of Sydney in the long run we should not let them into Australia we can recycle look at blacktown council it prides itself on 70 to 80 % in doing this now, we don't want extra cancer clusters for our grandchildren please blackban these from Australia it's all lies about clean air electricity generation we are all getting solar we will have airport issues tragic issues roads that can't cope now if this goes ahead I'll be one getting out of Sydney.
