INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Bedir Solbudak

Date received: 23 May 2017

I strongly oppose against deadly wrong poison project of the incinerator in western Sydney area sake of my family health and future coming generation.

We can make our future clean, safe and secure from wrong decision today's world.

My sincerely

Bedir Solbudak

To: Parliament N.S.W (comity)

Date: 23.05.2017

Dear sir/madam,

I'm one of the residents leaving in Erskine Park Sydney last 30 years peaceful environments and clean air until now; don't want any air pollution can be curate by waste incinerator proposed by N.S.W government.

Western Sydney residents are not second class citizens and western Sydney is not dumping ground for N.S.W WASTE.

- Eastern creek waste already fuming bad smell and gas around particularly at night time.
- There is another waste place at Kemps creek not too far from us
- The purpose incinerator will be disaster for big area in western Sydney (Health ways)
- I don't want coming new generation breathe toxic gas, fume in the air from this wrong place incinerator plant.
- This project will be Cancer in the western Sydney for us.
- I don't understand if government need energy, why not go solar/wind or others alternative.
- Our health cannot be substituted by money saving, waste burning.
- One coal power station won't be dangerous as waste incinerator.

I strongly oppose against deadly wrong poison project of the incinerator in western Sydney area sake of my family health and future coming generation.

We can make our future clean, safe and secure from wrong decision today's world.

My sincerely

Bedir Solbudak
