INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Carolyn Ahmet

Date received: 23 May 2017

This submission is that I am totally against this going ahead. It is not fair to the residents of the surrounding area. This is a great health risk to everyone and will cause long term health issues in the western Sydney. Another idea needs to be thought of. Please stop this from going ahead it will cause more problems that you would ever think.
