INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 23 May 2017

Partially
Confidential

My husband and I have recently purchased our home in st clair and are raising a young family. We are in the process of enrolling our 4 year old daughter in school in close proximity to this incinerator project and don't believe it's fair on her or on her young peers to be exposed to such filth emitted from the incinerator. It is not only derogatory to propose an incinerator in Sydney's west but quite careless and prejudice to assume we wouldn't mind you putting it so close to homes, schools and communities. It will not only effect the health of 6500 families residing in st Clair but the surrounding suburbs of erskine park colyton and Eastern creek of course. Not to mention the financial losses we will be forced to cope with, with the value of our main asset being jeopardised dramatically. Please consider submissions like this as it's written by a mother of a family who has just invested much of her and her husbands life earnings in residing in beautiful st Clair.

Surely this incinerator project can be relocated to a more rural location away from so many houses and families where no one will be affected.
