INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Peter Robertson

Date received: 23 May 2017

I do not understand how this proposal is still progressing when the EPA and NSW Health are both against it not to mention the communities that will be affected by this INCINERATOR.

Why is there so much secrecy about this issue, my federal member sent a letter regarding this Government inquiry five days before submissions close. My state member was very quiet on the subject until she came to a community meeting where she was given a very angry reception, and at that same meeting the Federal Member did not utter a single word regarding on which side of the fence he and his party stands.

' Energy from waste' is such a crock especially to the residents around this proposed incinerator site at Eastern Creek. No one cares that these rubbish burners are used throughout Europe, Japan and USA, and they have been using them for years. The thing is, they are not building them any more, what will happen to the toxic fly ash were are they going to put it ?

This proposal should not be allowed to go ahead, for the sake of our children, what sort of world are we going to leave them, its their future that has to be protected
