INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Jason Edwards

Date received: 24 May 2017

I am writing to voice my strong concern and objection over the consideration of waste to energy incineration in Western Sydney. I live close to a proposed incinerator at Eastern Creek. Western Sydney already has to cope with high levels of air pollution. Placing an incinerator so close to residential suburbs is dangerous and irresponsible. Let's not put the health of NSW people at further risk from harmless toxins, the unavoidable consequence of burning waste.
