INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Ms Sonia Bennett

Date received: 24 May 2017

The Incinerator issue in western Sydney. I don't want an incinerator to be built in western Sydney because of health reasons for everybody. We have problems with Asthma, cancer with lung problems. Asthma is probably the highest in the country. Children's health is at risk and so is the elderly. It's too close to suburbs. An Incinerator plus the plans to build another polluter Badgerys creek airport will add to the health problems of everybody in western Sydney. This incinerator will not give many jobs as well. So don't build an incinerator in western Sydney. Sonia Bennett
