INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Joseph Incorvil

Date received: 24 May 2017

My family have lived in this area since 1985, and the regular disgusting foul stench that is omitted from Wallgrove Rd tip is more than we had bargained for. Lodging complaints to the EPA did absolutely NOTHING to remedy this problem. We believe a new Waste Facility site in our area will add further to the undesirable effects that will impact on our daily lives. Would you want this facility under your nose.
