INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Robert Lewis

Date received: 24 May 2017

"Energy-from-Waste Incinerator - Eastern Creek"...

Simply stated, I object to another dirty, smelly and probably hazardous facility being located (dumped) in Western Sydney..... most mornings I can smell the dump near Wallgrove road. This new one will be no exception, despite assurances otherwise. Within the next few years we will be lumped with a noisy and polluting second Sydney 24 hour! airport.....and to top it off, in the next month or so, I will be paying around \$60 extra per week to get to work (reintroduced M4 toll)..... it is time that these type of impositions be shared around..... The residents of Western Sydney are again being treated like second-class citizens..... it is totally unfair to expect the West to accommodate all of Sydney's socially contentious physical needs.....
