INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Jennifer Sullivan

Date received: 24 May 2017

I oppose to the incinerator being built at Easteen creek, we get enough bad odour from the tip that is already there let alone to add to that with this incinerator, not to mention the name & reputation our suburb is getting, I don't want to be known as living in the stinky suburb. Also what will that do to our health is this going to make us sick will I need to be going to the doctor more often? These are questions I don't want the answer to be Yes but am afraid that it will be if this incinerator is built. Then there is house prices will they be less because people won't want to move here.
