INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Miss Alexandra Bellantoni

Date received: 24 May 2017

I oppose the construction of the Energy from Waste Incinerator, at the current time the current waste facility is already impacting my quality of life. At times i am unable to open the windows of my home due to the extreme odour that comes from the facility. At many times i suffer from breathing difficulties, I suffer from asthma and as i am unable to open a window due to the odour my condition escalates thus impacting my quality of life. Overall i cannot not come to expect an improvement from the proposed facility. Therefor am extremely opposed to its construction.
