INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Megan Malek

Date received: 25 May 2017

I object to the incinerator being built at Eastern Creek as I don't think that there is enough evidence to prove that the facility is 100% safe. I don't believe that it is going to be clean and think that there will be more pollution made.

There are so many what ifs that we don't have the answers to. I don't wish to hope that the pollution that this facility will make won't make people ill in the future. I want to know that it is fine and that there won't be any worry to the people to live and work in the area at the moment we aren't given any confidence that this is the case.

The roads in the area aren't coping as it is why would you consider making it even busier.

I don't want this facility built unless we are guaranteed that it is 100% safe and at the moment we don't have that guarantee.
