INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 25 May 2017

Partially
Confidential

I am writing to you to voice my family's opinion on the proposal to build a waste incinerator at Eastern Creek. Our family has lived in western Sydney for the past 40 years. We built our home at St Clair in 1983 and one reason for doing so was because there was less pollution in this area. Over time Sydney has expanded and pushed residents and commercial properties further into western Sydney bringing with it more pollution. On top of that we have the proposed second Sydney airport to be built not far away at Badgery's Creek which will be run 24 hours per day creating even more pollution with aircraft burning off fuels etc plus added traffic on our already congested roads.

Why would we want or need an incinerator built nearby therefore adding to the existing pollution problem causing problems for residents with asthma and other health issues.

If there is a need for an incinerator it should be built well out of the Sydney area.
