INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 25 May 2017

Partially
Confidential

I am a resident of Horsley Park. For more than 20 years we have had to deal with the issue of Landfill at Eastern Creek. Over the years we have been promised that its life span is limited. However this lifespan keeps getting longer. Now there is the proposal for an Energy from Waste Incinerator. All the issues that have been raised with the Landfill have not been addressed, if anything it has gotten worse. I am alarmed that once again Western Sydney is seen as second class. Dumping this at Eastern Creek just does not make sense. I urge the committee to not allow Western Sydney to again be the dumping ground for all of NSW's problems
