INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Name suppressed

Date received: 26 May 2017

Partially
Confidential

I object to a waste disposal facilities in my area. The reason most of the people live in the West was because we had clean air and the house's were a lot cheaper. But not now. Now we have to put up with the tip that smells all the time. Why do you people think you are better then us and we do not get a right to decide what is best for our area. I am sure there is somewhere else this could go. How would you like it being next to your house's.
