INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mrs Sharon Bellette

Date received: 26 May 2017

I would like to submit my opposition to building the energy from Waste incinerator at Eastern creek. The incinerator will produce massive amounts of pollution falling on our homes, schools and daycares. Our kids will be breathing in this pollution. Not to mention how it will contaminate local water supplies, market farmers crops etc. Also the roads are getting increasingly busier. The local roads can't cope with the amount of traffic as it is, not to mention once the airport opens up at Badgerys Creek. We simply do not have the roads needed to cope with the increase in traffic caused by the transporting of waste to and from the facility.

We already put up with the stench that wafts across our community from the nearby waste disposal facilities. Western Sydney is not a dumping ground. Can this facility be placed away from built up communities so it is not affecting any ones quality of life or health? Thank you for your time. Sharon Bellette
