INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr John Ackland

Date received: 26 May 2017

I want to object to the proposed "energy from waste" facility in Eastern Creek. As a resident of Erskine Park, I already get the putrid smell when the local tip burns off and it is disgusting. The introduction of any more incinerators of any kind is totally unacceptable. If it were to go ahead, it will become an unacceptable environmental hazard that will impact our whole community and cause residents to have respiratory issues. We bought into a nice area, please don't degrade our local community.
