INQUIRY INTO 'ENERGY FROM WASTE' TECHNOLOGY

Name: Mr Robert Hammer

Date received: 27 May 2017

We do not need another source of pollution in Western Sydney, however "low" the level of pollution may be from the proposed incinerator.

Western Sydney already has issues with pollution from rubbish dumps, burning off in the mountains, and planes using the future Western Sydney Airport.

An incinerator in Western Sydney seems to be at odds with the proposal to make Western Sydney the Third City within Sydney. What we need is high value jobs that will attract growth to the area, not pollutants that will drive high value development away.

Thanks

Bob Hammer
